S631 GNSS Receiver

The \$631 is Hemisphere's all-new multi-GNSS, multifrequency smart antenna. The \$631 provides robust performance and high precision under canopy and near buildings. With multiple wireless communication ports and an open GNSS interface, the S631 can be used in a variety of operating modes. Use the \$631 as a precise base station sending RTK to your existing rover network. Turn \$631 into a lightweight and easy to use rover by connecting it to your base via UHF radio or cellular network. The built-in web user interface (WebUI) can be used to monitor and control the receiver status and operation, as well as to upgrade the \$631 with new firmware and activations. \$631 is Athena™-enabled and Atlas®-capable (subscription required).

The \$631 GNSS receiver is powered by Athena RTK technology. With Athena, \$631 provides state-of-the-art RTK performance when receiving corrections from a static base station or network RTK correction system. With multiple connectivity options, the \$631 allows for RTK corrections •Long-range RTK baselines up to 50 km with fast to be received over radio, cell modem, Wi-Fi, Bluetooth, or serial connection. The \$631 delivers centimeter-level accuracy with virtually instantaneous initialization times and cutting edge robustness in challenging environments.

The S631 receiver also enables users to work with Atlas. Atlas is Hemisphere's industry-leading global correction service, which can be added as a subscription to the \$631. Atlas delivers world-wide centimeter-level correction data over L-band communication satellites. With Atlas, \$631 users experience sub-decimeter positioning performance anywhere on earth, without the need to be near a GNSS or communication infrastructure.

Key Features

- Multi-frequency GPS, GLONASS, BeiDou, Galileo, QZSS, IRNSS, and Atlas L-band.
- acquisition times.
- UHF (400 MHz & 900 MHz), cellular, Bluetooth, and Wi-Fi wireless communication.
- Athena GNSS engine providing best-in-class RTK performance.
- •Internal sensor corrects collected point coordinates to within 2 cm.
- Superior under tree performance with SureFix and Athena Multi-Path Mitigiation
- •12 Hour long endurance hot swappable batteries for all day working capacity.
